About Me

I am a third-year student at Alnasser University pursuing a degree in Cybersecurity and Digital Forensics. With a strong foundation in my field, I have gained valuable hands-on experience that enhances my understanding of cybersecurity principles and practices. I possess excellent problem-solving skills and a creative approach to challenges, enabling me to find effective solutions. Additionally, I actively engage in practical exercises on the TryHackMe platform, where I further develop my technical abilities and deepen my knowledge in digital forensics and cybersecurity.

Education

Third-year of cybersecurity

2021 - 2024

Alnasser university

Alkuwait high school

2018

English middle diploma

on 4U institute

Work Experience

Practical Experience:

Web Developer at University Business:
Designed the GUI for clothing & shoes as
part of a team.

Software Developer:

Product Management: Worked on
interfaces for registration, login, and
product management (design and
database linking) within a team.

Wireshark: Worked on displaying network
traffic and designing an interface for
display.

University Network: Programmed devices
for routers, switches, and firewalls
(routing, DHCP, DNS, AAA, HTTP/HTTPS,
NAT, DMZ).

App Development (Flutter): Designed
GUIs for login, registration, and home
pages (connected to a database).

Security Architecture & Hacking: Built
security architecture, performed system
hacking, and conducted criminal
investigations (using Active Directory,
Cisco firewall, investigative tools).

Cipher Chat: Worked on encryption and
decryption
